

n8n Manager — One-Click Install & Run Kit

(English)

A friendly Windows tool that lets even **complete beginners** install and launch n8n with **two mouse clicks and one key press**.

🌐 한국어 버전: [README.md](#) 📖 Detailed manual: [GUIDE.en.md](#) (English) · [GUIDE.md](#) (한국어)

i This kit is built **Korean-first** (the menu inside the tool is in Korean). This English README explains exactly what each step and menu does so non-Korean speakers can use it too.

🟢 What is this?

- **n8n** is a tool that automatically connects different internet services (email, messengers, Google Sheets, etc.) to **do repetitive tasks for you**.
 - e.g. "When an email arrives, send a phone notification", "Collect the news every morning".
- **This kit (the black-window tool)** is a Korean-language "remote control" that helps you **easily install, run, and manage** n8n.

- Don't worry if lots of text scrolls by in the black window — that's normal, not an error.

One-line summary: **Double-click** `n8n_Manager_One-Click_Install-Run.bat` , then **press one number key on screen**.

⚡ Quick Start (3 steps)

1. **Open the folder** you downloaded. Find the file `n8n_Manager_One-Click_Install-Run.bat` .
2. **Double-click that file**. A black window shows a Korean menu.
 - If a **blue warning window** (`Windows protected your PC`) appears, don't panic — see [👉 section 7](#). (You only handle this once.)
3. **Press the `[0]` key once**. (`[0]` = "처음이세요?" / "First time?") It installs and then launches automatically.

Shortly after, your web browser opens by itself and shows a **"Set up owner account"** screen. Just choose your own email and password to create the account. (This account is used **only on your own computer**.)

The first install may take **1–3 minutes** depending on your internet speed. If text seems frozen, please wait.

📋 Prerequisites / Required programs

Item	Required?	Notes
Windows PC	☒ Required	Windows 10 or 11
Internet connection	☒ Required	Needed for install/update
Node.js	☒ Required	The "base" program n8n runs on. If missing, this kit installs it for you automatically.
n8n	☒ Required	Installed automatically by menu <code>[0]</code> or <code>[1]</code> .

✅ **Nothing to memorize.** If Node.js is missing, the kit guides and installs it. Just press `[0]` . 💾
Disk space: About **0.5–1 GB** of free space is enough for Node.js + n8n.

Supported environment

- **OS:** Windows 10 / Windows 11 (built for Korean Windows; works on English Windows too)
 - **Hardware:** A normal office PC is enough (no special graphics card needed)
 - **Tested on:** Windows 11, n8n version 2.x
 - **Mac · phone:** This `.bat` tool is **Windows-only** (it will not run on Mac or phones).
-

How to download

This kit consists of **one file (.bat)** and **a few documents**. How you obtain it depends on where it was shared.

- **If you got a ZIP file:** right-click → "Extract All" → open the extracted folder.
- **If from a site like GitHub:** green `Code` button → `Download ZIP` → extract as above.
- **If you got the whole folder:** just use it as is.

✦ **Important:** Keep `n8n_Manager_One-Click_Install-Run.bat` and `사용설명서.txt` (the guide) **in the same folder**. (Menu `[9]` opens the guide from the same folder.)

If a file downloaded from the internet is "blocked" (one time)

Windows sometimes **locks** files received from the internet or messengers for safety. Unlock it like this:

1. Right-click `n8n_Manager_One-Click_Install-Run.bat` → **"Properties"**.
 2. If you see a small **"Unblock"** checkbox at the bottom, **tick it**.
 3. Click **"OK"**. (If the checkbox isn't there, it's already unlocked — just move on.)
-

How to install

There are **two ways**. For first-timers, way 1 is recommended.

Way 1) Automatic (recommended) — one `[0]`

1. Double-click `n8n_Manager_One-Click_Install-Run.bat`
2. Press `0`
3. If Node.js is missing, an auto-install prompt appears. Follow the on-screen guidance.
4. When install finishes, it **launches automatically**.

Way 2) Manual — [1] install only

1. Double-click the `.bat`
2. Press `1` → installs n8n only.
3. Later, press `[3]` to run it.

⚠ **If you just installed Node.js, fully close** the black window and **re-run** the `.bat`. (This lets the computer recognize Node.js anew.)

● If a blue warning appears on first run (must read)

The first time you double-click a `.bat` downloaded from the internet, a large blue window may appear:

"Windows protected your PC" / "Windows의 PC 보호"

This does **not** mean a virus — it's Windows' safety step for "a file it hasn't seen before". Proceed like this:

1. In the blue window, click the small text "**More info**".
2. A "**Run anyway**" button appears below — click it.
3. The black window (menu) then opens normally. (This is usually needed **only the first time**.)

💡 **If antivirus (security software) deletes or blocks the `.bat`** : briefly turn off the antivirus, or add this file to its "exception/allow" list, then run it again. If the file didn't come from a stranger, it is safe. (This kit only downloads n8n from the internet to install it; it does not touch your computer otherwise.)

▶ How to run

1. Double-click `n8n_Manager_One-Click_Install-Run.bat`
2. Press `3` ("Start n8n")
3. The browser opens by itself shortly. If not, type into the address bar: **http://localhost:5678**

How to stop: In the black window where n8n is running, press `Ctrl` + `C` together, and when "종료하시겠습니까(Y/N)?" ("Terminate? Y/N") appears, press `Y`.

For detailed screen explanations, first login, and your first workflow, see 🖱 [GUIDE.en.md](#).

Menu at a glance

In the black window, just **press one number key** (no Enter needed).

Key	Menu (Korean)	What it does
0	처음이세요? (First time?)	Install + run in one go (recommended first)
1	설치하기 (Install)	Downloads n8n onto your computer
2	업데이트하기 (Update)	Updates n8n to the latest version
3	시작하기 5678 (Start)	Starts n8n (use this normally)
4	시작하기 (Start, custom port)	Starts n8n on a port number you choose
5	백업 (Backup / open folder)	Safely copies your work
6	문제 해결 (Troubleshoot)	Auto-checks what's wrong
7	삭제하기 (Uninstall)	Removes n8n (keep work / full delete)
8	끝내기 (Exit)	Closes this menu window
9	사용설명서 보기 (View guide)	Opens the text guide in Notepad

Safety & privacy at a glance

The five things first-timers ask about most, kept short.

Question	Answer
 Does it cost money?	Running n8n on your own computer is free . (Different from the company's paid cloud service.)
 Is my data sent anywhere?	No. This tool and n8n run only on your computer . Your account and work are not transmitted externally.
 Do I always need internet?	Only for install/update . While running, it depends on the services you connect.
 Does it auto-start when I boot the PC?	No. n8n runs only when you start it with [3] (no auto-start).
 What if I forget my password?	The account lives only on your computer. If lost, you can delete the work folder (<code>.n8n</code>) and create a new one — but your automations are erased too , so back up with [5] first.

File & document locations

Kit files (inside the folder you downloaded)

File	Role
<code>n8n_Manager_One-Click_Install-Run.bat</code>	Main program (double-click this)
<code>사용설명서.txt</code>	Short Korean guide opened by <code>[9]</code> (Notepad)
<code>README.md</code> / <code>README.en.md</code>	Korean / English overview (this document)
<code>GUIDE.md</code> / <code>GUIDE.en.md</code>	Korean / English detailed manual
<code>README.pdf</code> · <code>GUIDE.pdf</code> , etc.	PDF versions (identical content)
<code>LICENSE</code> / <code>NOTICE</code>	License & copyright info

Folders n8n creates (automatically)

Location	Contents
<code>C:\Users\yourname\.\n8n</code>	Where your work (automations) is stored. Keep it safe.
<code>C:\Users\yourname\n8n_backup_(date)</code>	A copy made when you press <code>[5]</code> Backup
<code>(kit folder)\n8n_진단결과.txt</code>	The check result saved when you press <code>[6]</code> Troubleshoot

? If something goes wrong

1. First press `[6]` **Troubleshoot**. It auto-checks Node.js / n8n / internet and even tells you "**what to do next**".
2. If a **blue warning** (`Windows protected your PC`) blocks it → see [section 7](#) ("More info → Run anyway").
3. If still stuck, **right-click the** `.bat` → "**Run as administrator**" and try again.
4. Send the check-result file (`n8n_진단결과.txt`) to whoever helps you — it speeds up the fix.

For symptom-by-symptom fixes (browser won't open, port in use, forgot password, broken Korean text, etc.), see the "Troubleshooting" chapter in  [GUIDE.en.md](#).

License · Copyright · Commercial use

 Please read this. There are two different licenses involved.

1) License of this kit (the installer tool & docs)

- The **original files of this kit** (`.bat` , README, GUIDE, etc.) are provided under the **Apache License 2.0** (see the [LICENSE](#) file).
- Copyright: **Copyright 2026 SoDam AI Studio** (see [NOTICE](#)).
- You may freely use, modify, and redistribute them, but you must **keep the original copyright notice and the LICENSE/NOTICE files** (and if you distribute a modified version, **state that you changed it**).

2) License of n8n itself (★ very important)

- This kit only **downloads and installs n8n from the internet (npm)**; it does **not** bundle/redistribute the n8n program.
- **n8n uses the "Sustainable Use License" (fair-code)**. It is **NOT** a standard OSI-approved open-source license. Some components may be covered by the separate **n8n Enterprise License**.
- **Allowed:** personal use, **internal business use**, self-hosting (running on your own computer), viewing & modifying source code.
- **Restricted (regarding commercial resale):**
 - Selling n8n **as a service** to third parties
 - Offering n8n under a **different name (white-label)**
 - **Redistributing n8n as the back-end** of a commercial product
- If you need a **commercial use** that falls under those restrictions, you need **n8n's separate permission or an Enterprise License**.
- Official sources (please **verify directly** before any commercial use — license terms may change):
 - Sustainable Use License: <https://docs.n8n.io/sustainable-use-license/>
 - License text: <https://github.com/n8n-io/n8n/blob/master/LICENSE.md>
 - Pricing / Enterprise: <https://n8n.io/pricing/>

3) Trademark

- **"n8n"** is a trademark of **n8n GmbH**; **"Node.js"** is a trademark of the OpenJS Foundation; **"Windows"** is a trademark of Microsoft.
- This kit is **not an official n8n product** and has **no sponsorship, affiliation, or endorsement** from n8n GmbH (it is an unofficial helper tool). See [NOTICE](#).

 **Plain summary:** "Installing it to use for your own work / your company's internal work" is fine. "Selling n8n to others as a service or under another brand" requires n8n's permission.

Disclaimer (please read)

- This kit is provided "as-is" with no warranty of any kind. You are **solely responsible** for any results of using it.
 - This tool runs **only on your own computer**. It does not send your data anywhere.
 - **Passwords and your work are your responsibility**. Use `[5]` Backup for important work, and **always back up before** `[7]` **full delete** (full delete cannot be undone).
 - Never run a `.bat` file sent by someone you don't trust.
-

The content of this document (README.en.md) and README.en.pdf is identical. The PDF is generated directly from this .md file.
